Career Objective

Build a career as a software developer by leveraging my rigorous attention to detail, can-do attitude and love of learning which I've developed over my career as an Aircraft Structures Technician.

Technical Skills

HTML, CSS, JavaScript:

- Built a website for a fictional company using HTML & CSS while tracking changes with GIT
- Coded JavaScript that uses the GitHub API to populate a Google Sheets document with data.
- Cloned the Yelp service using React and Yelp's own API.

Work Experience

Aircraft Structures Technician

January 2016 - Present

MHI Canada Aerospace – Mississauga, ON.

- Produced high quality aircraft structures with a meticulous attention to detail that led to exceptionally low defect rates.
- Innovated on standard production processes and reduced manufacturing time by about 150%.
- Created a production tracking system to provide supervisory staff with at-a-glance updates on the status of a build.
- Trained and motivated 10 new employees in structures assembly leading to increased production with minimal errors resulting from the learning processes.

Assembly Technician

January 2015 – November 2015

Noranco Manufacturing – Pickering, ON.

- Selected, produced, and shipped hundreds of aircraft components with minimal supervision.
- Contributed to the administration of the quality management system by keeping accurate production documentation.
- Learned dozens of new production tools, techniques, and processes.
- Communicated with supervisory staff to ensure that work was prioritized correctly.

Education

In progress - Software Engineering Technician

September 2020 – Present

Centennial College – Toronto, ON.

Bachelor of Arts – Psychology

September 2007 – April 2013

Ryerson University – Toronto, ON.
